One platform – Five Advantages

Automated End-to-End: One click seamless transition from comprehensive AI Maturity assessment directly to a tailored Implementation Plan.

Role-Based Normalisation: Intelligently normalises diverse inputs from various roles to establish an accurate baseline of your current AI preparedness.

Continuous Tracking: Monitor maturity improvements over time and simulate scenarios to adapt your strategy dynamically.

Dynamic Roadmaps: Automatically generate execution roadmaps tailored specifically to align with your unique objectives and timescales.

Codified Best Practices: Leverages a deep repository of industry AI best practices as a reference framework to ensure maximum value realisation.

Alsend's 360° Capability Scoring Engine analyses your enterprise readiness across multiple dimensions..

Capability ~ [f(Roles), f (Subject Matter expertise), f(Objectives), f(AI Best practices), f(Operational Span)]

Complex multidimensional correlation helps you clearly define the roadmap and achieve the objectives

The Rules Engine leverages AI best practices to build the AI maturity improvement plan
